

EAR TRAINING—AUDIATION EXERCISES FOR LESSONS 5-7

The following list of 4-note patterns provides further practice to accompany each lesson. On the accompanying mp3, each pattern is played on the piano, followed by 6 beats of silence. You should also feel free to pause in between examples if you need more time.

There are many ways to use this sheet and the mp3:

- 1) Sing back each pattern on sol-fa syllables after it is played on the mp3.
- 2) Write down the pattern (using the key below) after it is played. (Check against the list below afterwards.)
- 3) Sing back the pattern on pitch names. They are played in the key of C (C=do), but you could also sing it as if it is a different key, such as F or G.
- 4) Using music manuscript, write down the notes in the key of C. (You may need to pause between the playing of each example.)
- 5) Using the mp3 and the list before, sing the example BEFORE it is played, so that you can check yourself.
- 6) Sing through all of the exercises without the mp3.

Don't be discouraged! These exercises are not about being right or wrong; simply doing them repeatedly will strength your aural skills.

Key: D= do; R= re; M=mi; S=sol; S,-=low sol; D'= high do; L=la; L,=low la

MEMORIZATION EXERCISE FROM LESSONS 6 & 7:

(all rhythms are a 3-note triplet plus a quarter note)
